

Deep Future: The Next 100,000 Years of Life on Earth

By Stager, Curt

St. Martin's Griffin, 2012. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service!

Summary: A KIRKUS REVIEWS BEST NONFICTION BOOK OF THE YEAR " Deep Future is a richly informative and deeply persuasive book -- one that will be relevant for generations." Elizabeth Kolbert, author of Field Notes from a Catastrophe "Amid all the ranting, confusing, and contradicting books on climate change, at last here's one that does something truly useful: Clearly and engagingly, scientist Curt Stager guides us back into the atmosphere's history, letting us compare it to the present and draw informed ideas about what to expect in the future. It's heartening to know that he expects us to have one." Alan Weisman, author of The World Without US " Deep Future is like one of Jared Diamond's magisterial accounts, except set in the future, not the past." Bill McKibben, author of The End of Nature and Eearth "A highly entertaining, carefully balanced, and deeply sobering look at our climate future." William F. Ruddiman, author of Plows, Plagues, and Petroleum "Fascinating and measured - at last someone is taking the long view." Mark Lynas, author of Six Degrees "This intriguing and thought-provoking view of...

Reviews

This ebook will be worth acquiring. It is actually written in basic phrases instead of hard to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.
